

## ADDITIONAL SERVICES

ConnectEDU and CaseNEX offer an array of tools that connect to EngageNY for an additional cost. With these additional services, districts can manage complex student data to inform and support instruction, professional development, college and career readiness, curriculum planning, accountability, and policy.

### Connect! College and Career Planning Portal

The Connect! College and Career Planning Portal empowers learners to make informed decisions by providing a web-based platform where parents, counselors, educators, mentors, and employers can engage with learners to effectively support their next steps toward college and career. The portal securely integrates with student information system data and tracks each learner's progress as a way of providing a reliable and secure source for districts to report on performance at the district, school, and student level. The Connect! College and Career Planning Portal has a proven track record across states like Massachusetts, Louisiana, and Hawaii, where users are realizing success in connecting seemingly disparate data points to inform student decisions toward college and career.

### Skedula Teacher Management Solution

Skedula provides school districts with a teacher management solution that empowers teachers to manage their day-to-day data needs while integrating direct connections to their Student Information System and other school-based data systems. Teachers can keep track of and provide parents with assignments and lesson notes, access full online gradebooks with standards-based outcomes. The system provides a messaging system, attendance application and tracking system, anecdotal and discipline reporting, full student profiles, and a data analysis tool for teachers. Skedula makes it easy for administrators to view, assess, and cross-reference data, while assisting teachers to manage their individual data needs.

### Data Driven Classroom Assessment System

Data Driven Classroom provides small and large K-12 school districts with an affordable, powerful assessment system to manage all of their formative assessment and benchmark testing, while integrating all state testing analytics. Users can easily create plain paper, scannable exams and align questions to state standards. Low-cost, multifunction scanners are used to instantly score assessments online. Test scores can be disaggregated by teacher, grade-level, school, district, ethnicity, gender, language fluency, program and interventions services. Any assessment from formative exams data can be compared to students' state assessment data over time using our dynamic reporting tools.

### PALS

Early literacy screening is the key to providing effective literacy instruction and preventing future reading problems. The Phonological Awareness Literacy Screening (PALS) provides a comprehensive assessment of young children's knowledge of the important literacy fundamentals that predict future reading success. PALS consists of three instruments: PALS-PreK (for preschool students), PALS-K (for kindergartners), and PALS 1-3 (for students in Grades 1-3). PALS assessments are designed to identify students in need of additional reading instruction. PALS also informs teachers' instruction by providing them with explicit information about their students' knowledge of literacy fundamentals. Mid-year assessment and PALS Quick Checks allow for ongoing monitoring of student progress throughout the year.
