![Datacation COMPASS logo]

Built specifically for New York schools, DataCation Compass is an education-based dashboard developed by CaseNEX and ConnectEDU. DataCation Compass brings together the expertise of two companies who have partnered to bring success to New York schools in their transition to the Common Core State Standards. CaseNEX provides the foundation for the dashboard in their widely-adopted DataCation product suite, used in over 600 schools in the state of New York. ConnectEDU brings an expertise in managing often disparate data sets to contextualize and inform stakeholder decision-making, garnering success across several state-wide initiatives, including Massachusets, Lousiana, Hawaii, and Texas. Together, ConnectEDU and CaseNEX seek to empower educational instruction, and improve student learning outcomes.

Key Features

- Assessment data mapped to Common Core Standards offers support to teachers and students
- Recommendations Engine delivers relevant content recommendations tailored to students' needs
- Learning Maps allow teachers and students to set learning goals and track progress toward those goals
- Early Warning Indicator Flags identify students based on predetermined metrics and goals
- Comparison Tool provides data-driven reports on how schools or districts stack up against other schools and districts across the state of New York

Key Benefits For Administrators

- Streamlines data to view multiple data points on one screen
- Easily compiles comparison reports—school to school, school to district, district to district, and district to state
- Equips schools with resources they need to keep their students on track with Common Core Standards
- Offers content recommendations tailored to specific student needs
- Utilizes real-time assessment data linked to Common Core Standards to better support teacher and student performance

> "The assessment tool allows you to pick the standards you want to use, so your assessment is ultimately Common Core-based."
>
> Ellen Pavda
> Network Leader, NYC School System

Key Benefits For Teachers

- Automatically maps student performance to Common Core Standards
- Recommends content for students based on their individual learning needs
- Prepares visual learning maps for students to track their progress
- Utilizes early warning indicator flags to assess which students are on track and which students need assistance
- Easily compares classroom performance against other schools and districts

> "DataCation provides me with the information on Common Core Standards that is just so necessary for students to complete their high school requirements… [Common Core] is out there, there's no turning back, and DataCation really helps provide me with the information I need to get my students where they need to be."
